***Examiner's Amendment***

1. An Examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to Applicant, an amendment may be filed as provided by 37 CFR 1.132. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this Examiner's amendment was given in a telephonic interview with Mr. Leon on June 21, 2005.

The application has been amended as follows:

**In the claims:**

Claim 1, paragraph H., line 2: --by physical contact and-- has been inserted before "by use of a".

***Reasons for Allowance***

2. The following is an examiner's statement of reasons for allowance of claims 1 and 7-14.

For independent claim 1, the prior art of record does not disclose or clearly suggest a method to determine the angular orientation between two surfaces using a first frame, a second frame, at least two measuring points defined on said first frame at a known distance apart and at least two measuring points defined on said second frame at the same said known distance apart,

Art Unit: 2859

and the positions of said at least two measuring points on said first frame are measured relative to the positions of said at least two measuring points on said second frame by physical contact and a length measuring device in combination with the remaining limitations of the claim.

Claims 2-13 are allowed due to their dependency on allowed claim 1.

For independent claim 14, the prior art of record does not disclose or clearly suggest a method to determine the angular orientation between two surfaces using a first frame, a second frame, at least two measuring points defined on said first frame at a known distance apart and at least two measuring points defined on said second frame at the same said known distance apart, and the positions of said at least two measuring points on said first frame are measured relative to the positions of said at least two measuring points on said second frame, and wherein at least one of said relative position measurements is measured by using the change in length of a string under tension in combination with the remaining limitations of the claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

Art Unit: 2859

3. The prior art made of record and not relied upon is considered pertinent to Applicant's disclosure. The prior art cited in PTO-892 and not mentioned above disclose related methods and apparatus.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to R. Alexander Smith whose telephone number is 571-272-2251. The examiner can normally be reached on Monday through Friday from 9:30-6:00.
